Command and Control of Contingency Contracting

COL Scott Risser

Director, Contingency Contracting

Army Contracting Agency

HQ, ACA ISO 9001:2000 CERTIFIED

WHERE CCOs WORK

CONTINGENCY CONTRACTING

- Contingency contracting supports **military operations spanning the operational spectrum**.
  - Disaster relief, humanitarian assistance, exercises and peacekeeping missions.
  - Major contingencies; mid and high intensity conflict.
- Contingency contracting personnel serve as a **proven combat service support force multiplier**, allowing commanders to supplement organic combat service support with goods and services available in or near the mission area.
  - Provide commanders enhanced operational flexibility.
  - **Integrates procurement planning into operational planning.**
  - Advises commanders how to coordinate combat service support, commercially – available goods and services, assistance – in – kind and host nation support, Allied and international support, and other available support into an integrated mission support infrastructure

CONTINGENCY CONTRACTING

- The ACA performs the same functions for Army contingency contracting soldiers as a TRADOC school or center's Directorate of Combat Development **(we do for CCOs what Fort Benning does for Infantrymen)**:
  - Army Doctrine and Army input to Joint Doctrine.
  - Force Development / Force Structure.
  - Individual and Collective Training Standards.
  - Army Training and Evaluation Program.
  - Standard Equipment.
  - Exercises.

- **Except:**
  - We don't serve as a Branch schoolhouse; **DAU** does (but we advise).
  - We don't serve as a Branch proponent; **ASC** does (but we assist).

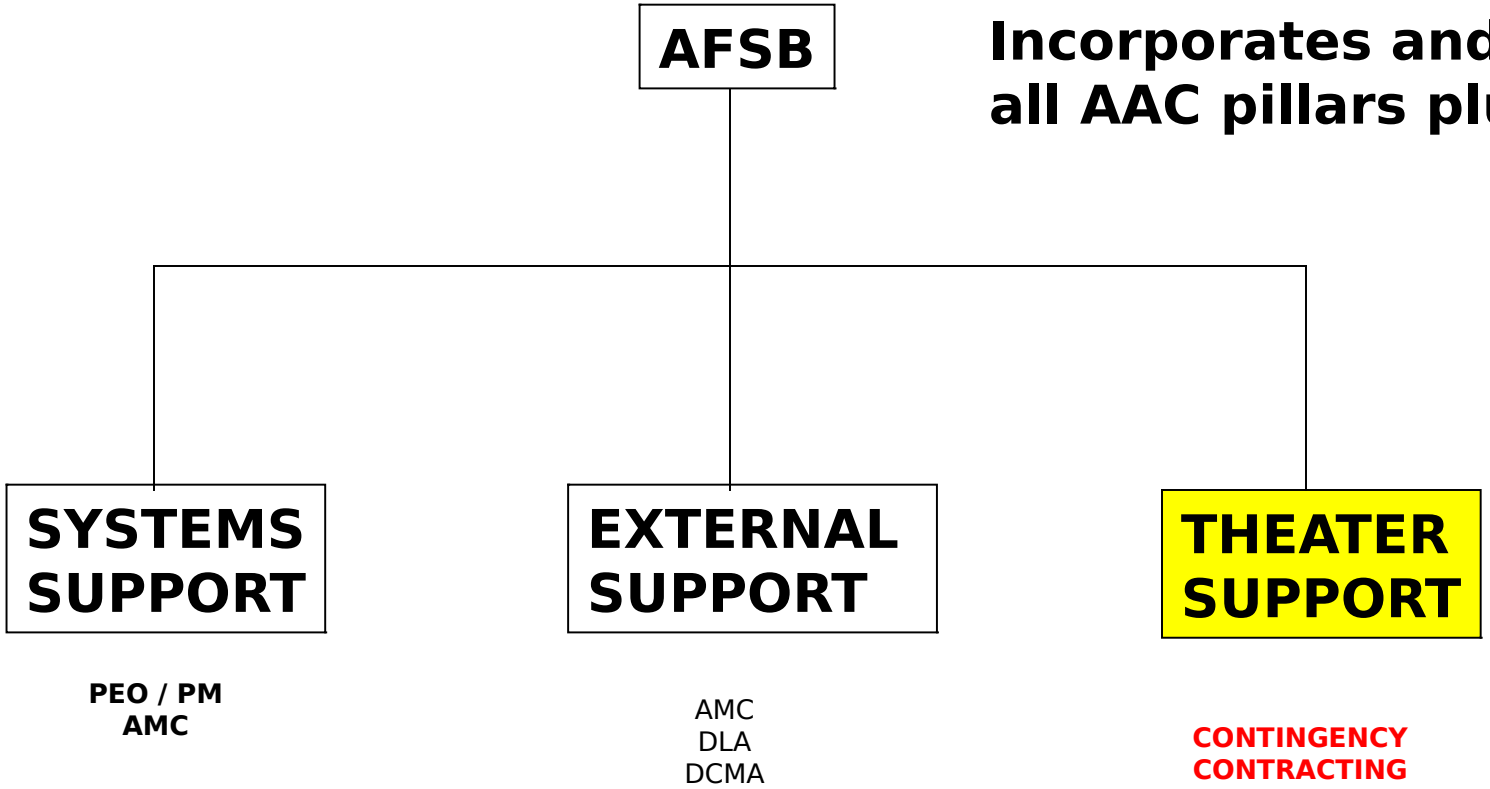
ARMY FIELD SUPPORT BRIGADES



Incorporates and integra
all AAC pillars plus AMC

CONTINGENCY CONTRACTING

Contingency Contracting Force Structure

- Modular teams, cellular commands **with UTCs** replace the current practice of assigning individuals **to maneuver units**.
- 4 – person modular CCO teams form the **basic unit of maneuver** for all Army contingency contracting.
- 100 – person cellular CCO battalions.
  - 20 – person headquarters (includes 3 organic CCO teams).
  - Commands 20 modular CCO teams and UEx teams.
- Commanders **sustain operations via TPFDDL** vice JMD and WIAS taskers.
- Contracting commanders who plan the mission command the soldiers.
- Allows collective training, ARTEP / MTP and exercises for teams.
- **Staffing the draft basing plan now.**

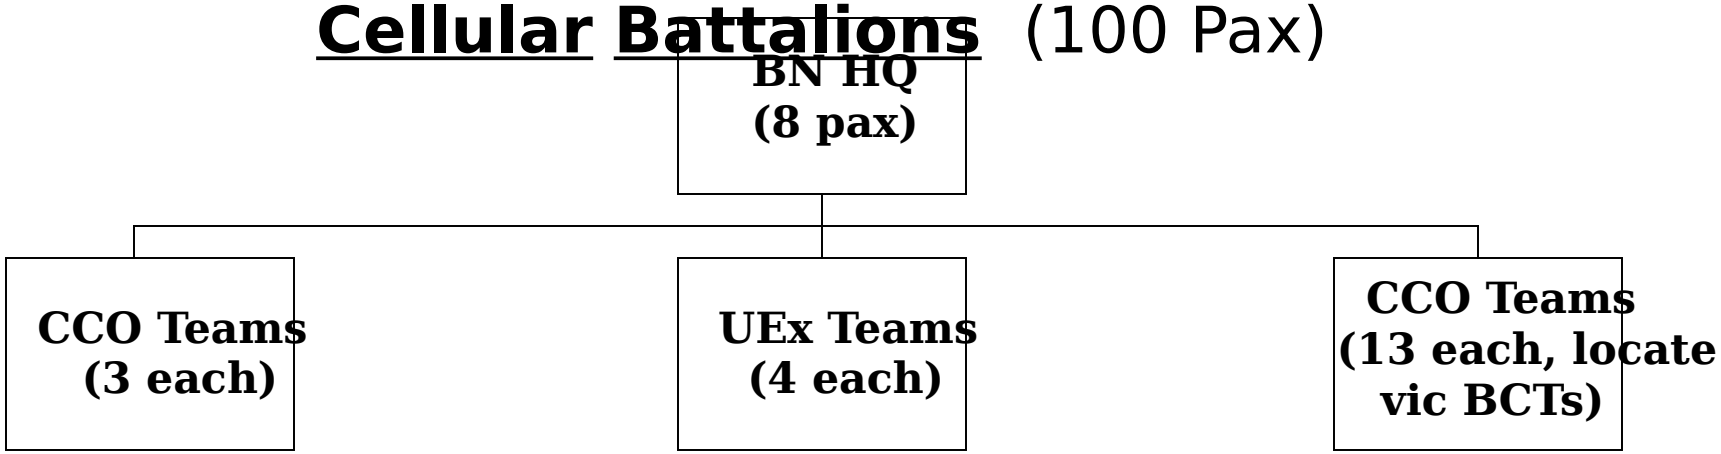
CONTINGENCY CONTRACTING

Proposed Contingency Contracting Force Structure

Modular Teams

1 Major
1 Captain
1 SFC
1 SSG

Cellular Battalions (100 Pax)



CONTINGENCY CONTRACTING

Standard Contingency Contracting Teams

- 4 – person **modular teams, cellular commands with UTCs**.
  - Modular teams designed to support a BCT (@ 3,500 soldiers).
  - **Basic unit of maneuver** for **all** Army contingency contracting.
  - Teams establish and sustain operations up to **180 days** in austere environment.
  - Teams can perform limited split operations.
- **Modular** equipment packages with **scalable servers** to allow "stacking" teams to form larger mission offices as required.
  - Can add individual augmentees.
  - Can add or link to deployed divisional / other Corps teams.
  - Can link to other Services contingency contracting teams.
  - Can link to DoD Agencies / contracting offices with SPS worldwide.
- **Identical** team structure in the AC, USAR and ARNG.

Army Contingency Contracting Equipment Set (ACCES)

- Modular equipment package **standard** across the Total Army.
- Configuration control retained at Army level.
- Army procures and fields; listed on draft TOE being staffed.
- Equipment package envisioned to support team operating in austere environment, which includes:
  - Laptop computer with PD2 for each team member, with rechargeable batteries.
  - Scalable server capable of accommodating up to 20 laptops.
  - Printer.
  - Generator.
- Prototype being tested in Iraq **today**!
